## Use Keynote and PowerPoint to Prototype Web and Mobile Apps

Keynotopia is the largest collection of UI design templates for creating mockups, wireframes, and interactive app prototypes in 30 minutes or less, using Apple Keynote or Microsoft PowerPoint.

The image shows a Mac OS X desktop environment with a Keynotopia application window open. The window displays a Keynote presentation slide titled "HOME" with a green header and a white background. Below the header, there's a section with a green button labeled "Create Your Goals and Specify Your Deadlines". To the right of the slide, there are two iPhone screenshots. The top one shows a food delivery app with a juice and smoothie menu. The bottom one shows a smoothie with a price tag of \$7. In the foreground, two physical smartphones are displayed side-by-side. The left phone shows a task management app with a list of items like "Read Zero To One", "Take out the trash", and "Clear-the-garage". The right phone shows a map-based app with a location pin and a rating of 4.7 (51). The Keynotopia logo is visible in the top left corner of the desktop screen.

# iOS

Apple UI Design Resources for iOS include Sketch, Photoshop, and Adobe XD templates, along with comprehensive UI resources that depict the full range of controls, views, and glyphs available to developers using the iOS SDK. These resources help you design apps that match the iOS design language. Icon and glyph production files are preconfigured to automate asset production using Sketch slices or Adobe Generator for Photoshop CC. Color swatches, dynamic type tables, and fonts are also included.
